Company Profile

a concern of
Glory Group

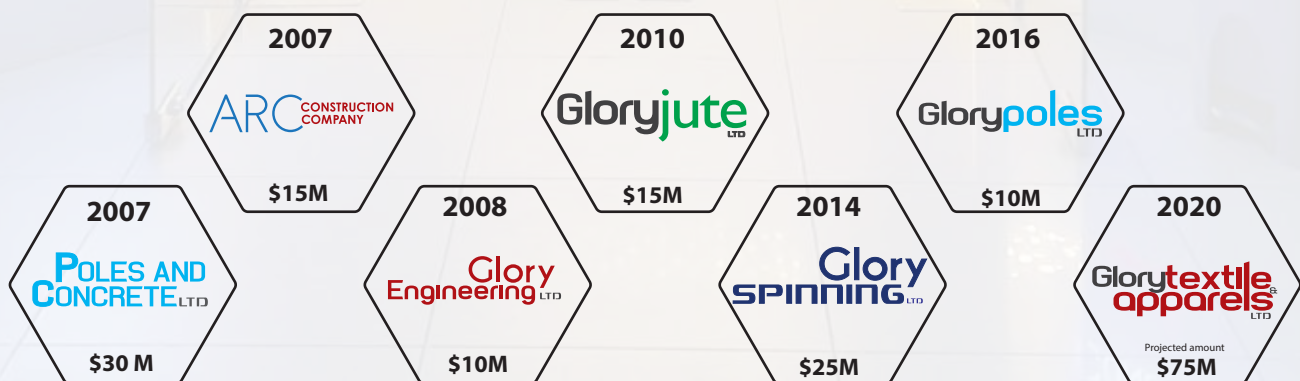

About Glory Group

Glory Group is one of the leading conglomerates in Bangladesh with a versatile set of affiliated companies in Infrastructure, especially in electrification, gas transmission, and agricultural sector, Jute and RMG sector share common principle of innovation service. We have an excellent management team, with over 39 years of vast experience in different engineering and manufacturing sector.

Glory started its journey in 2007 by taking over two companies, Poles and Concrete Limited and ARC Construction Company. Our engineering and Construction capabilities have continued to expand with the introduction of Glory Engineering Limited in 2008, a high carbon steel Pin and Steve factory, which is catering to our in-house demand for Jute Industry as well as for almost all jute mills over the country. In the year 2010, the company diversified its business by setting up a composite jute industry in the name of Glory Jute Limited. Besides these Glory Group has kept its continued development by setting up a new spinning mill in the textile sector as Glory Spinning Limited of 40,000 Spindle capacity plant near capital city Dhaka. Today Glory Group is a family of more than 6000 members with a yearly turnover of \$184 million. While we hope to have vigorous growth in our business, we are keen to see that it happens in a sustainable and harmonious manner with one's natural and social climates.

Currently, Glory Group is running successfully with its seven sister concerns.

Managing Director's Message

Md. Moniruzzaman Sheikh
Managing Director

I have started with a humble beginning and come a long way in 13 years, with the constant sustenance and help of our customers, suppliers, and our own team. That is why personally I consider Our Valued customers, our backend support-lines, and Glory Team are one team working together to achieve business excellence and sustainability.

Our clients come first and I would like to thank our clients who trusted in our capacity and have given us the opportunity to have a sustainable business and allowed us to grow together.

We have always maintained a cordial and supporting relationship with our suppliers and I express my sincere gratitude to them for staying with us in our highs and lows.

Last but not the least, thanks to all my colleagues in different capacities who have given us their times, services, and love in making our business grow. I have been in business since 2007 and I take pride in saying that, we have never had a single strike. Over the years, I have learned that to have a happy pool of end colleagues, you need to make sure that Floor Management behaves properly when dealing with the team. Our workers are to be given the respect they are due.

Glory Spinning Limited

In modern fashion technology, the demand for perfection begins right at the birth of the raw material, permeates through every single process, till the highly discerning customer dons the finished garment. It is this demand for perfection that has spurred the growth of an organization and its corporate philosophy.

Glory Spinning Limited (GSL) is a multi-unit, multi-interest business group with a wide range of industrial activity, an organization that has founded its evolution on value-based commercial practice. Glory Spinning Limited was established in 2010 with an initial capacity of ring 40,000 spindles. The company produces high-quality Cotton Yarn. The annual rated production capacity is 7 million kg's of NE 16/1 to Ne 34/1 Carded Ring Yarn. The plant is located in Purura, Valuka, Mymensingh. The main machinery of the plant is a new European brand machine. The company believes in maintaining a reputation in the industry sectors, customers, and among financial institutions. A strong presence has been established by delivering world-class quality products, an efficient marketing network backed by a team of professionals has further added to the company's performance and reputation. The product mix is flexible; we are able to manufacture different products as per the demand of our valued customers. Our production capacity is 7,000,000kg per annum.

Those who can furnish clients with the best quality, competitive price, excellent customer services, and prompt delivery can only survive in the market. Glory Spinning Limited takes immense pride in perceiving its role as the comprehensive architect of every single yarn that it produces.

Dyeing Finishing

We have 40-tons/ day finishing capacity for dyed fabric. In open width line, dyed fabric is being slitted to open by auto slitting/squeezing machine. Then for distortion detection and correction, the Stenter machine is used, which is equipped with Mahlo RMS branded Weft straighteners. Lastly, we complete the finishing process by using the compacting machine.

A bit different process is used for finishing Tubular Fabric. At first, fabric goes to the tubular squeezing machine, then goes to the steam drying machine, and finally compacting machine for better control of shrinkage and GSM.

For Raising/napping, for complete range of accessories for woven and knitted fabrics that are suitable for open width and/or tubular fabrics, which have working width from 1,800 mm to 3,600 mm.

Sustainability

GTAL team working continuously and tremendously towards a greener factory, environmental stewardship, and world-class supply chain, thus making us a sustainable corporate citizen by being responsible towards the environment, society, our products, and our team.

As part of our drive to materialize a green workplace, GTAL has established a highly advanced Biological Effluent Treatment Plant (ETP) with a capacity of 4,000 cubic meters/ per day metric tons and Water Treatment Plant (WTP) with the capacity of 550 cubic meters/ hour to ensure water usage is drained and reused within the facility.

GTAL has been making relentless efforts to motivate, and guide its employees to become more responsive towards the environment through energy-efficient production, sustainable use of natural resources, and green building. We are in the process of applying for LEED certification. Not only that, with an aim to bring a balance to the eco-system and to expand verdant cover, much of the area within the plant has been covered with lush green lawns and flower gardens.

We are also working arduously to minimize energy consumption and reduce greenhouse gas emissions. Moreover, to tackle any power-shortage, instead of using diesel generator, we are using gas generators to ensure less emission of Carbon dioxide (CO₂). In addition, we have enforced the recycling of waste and implemented the usage of double-sided copy-machines while discouraging printing papers in the office. No matter how small or big the initiative is, employees are encouraged to follow them.

Not only that, but our raw material suppliers also have to go under a critically screening process to ensure receiving environment-friendly materials in our factory and we encourage them to follow a sustainable practice of business.

Achieving sustainability is a continuous process and GTAL promises never to stop working to be a green and responsible corporate citizen.
